Tens of thousands of Americans die and nearly one million medication errors occur each year from preventable medical mistakes made in hospitals. That's why the Virginia Business Coalition on Health became Regional Roll-out Leader for Virginia through The Leapfrog Group, which was formed by The Business Roundtable purchasers to help save lives and reduce preventable medical mistakes.

Your commitment to patient safety and public accountability is outstanding. "Thank You" for your leadership and for voluntarily reporting your progress to The Leapfrog Group's Hospital Quality and Safety Survey. Now, consumers can get local hospital patient safety information with just a click of the mouse at [www.leapfroggroup.org](http://www.leapfroggroup.org).
